i3CE 2024 Workshop: Designing for Inclusion in Academia

As the kickoff of the newly formed Committee on Fostering Inclusive Academic Communities, the newest committee under the Computing in Civil Engineering community, we invite all attendees of i3CE24 to join us in celebrating by participating in this workshop!

Details

Date: July 28, 2024
Time: 3:00 pm – 5:00 pm EDT
Location: i3CE24 Conference Venue – Brighton Room 1*
Organizers:
  Dr. Sheryl Staub-French, UBC
  Dr. Jennifer Lather, UNL
  Dr. Mehmet Ozbek, CSU
  Dr. Sagata Bhawani, CSU-Fresno
Registration Form:
https://forms.office.com/r/pbprUpQdiZ

*Note: a limited number of remote spots will be available!

Description. This workshop aims to provide experience for participants in designing for inclusion in their research, teaching, and professional environments. This workshop will help participants consider what it means for our community to conduct research and train future engineers to be professional, ethical, and inclusive, and to support the diversity of the communities we represent and serve.

This workshop is for all academics and disciplines in the scope of i3CE 2024, especially senior faculty, junior faculty, post-docs, and graduate students. All identities are welcome.

Learning Objectives. By the end of the workshop, participants will be able to:
1. Understand the fundamental concepts of diversity, equity and inclusion (DEI), such as positionality, intersectionality, bias, and systems of oppression.
2. Explore methods to address and disrupt micro-aggressions and develop tools to act as allies in our workplaces and professional environments.
3. Develop approaches to design inclusion into Civil and Construction Engineering research, curriculum, and culture.

Join us at i3CE24 to learn and work on designing inclusive academic environments!

REGISTER BY: July 14, 11:59pm, AoE
