Internet Court of Lies and Covid 19
Robert Thibedeau

Robert Thibadeau proposes a Computational Cognitive Neurscience approach to lies, disinformation, and misinformation in digital media.

One result is a proposed system called The Internet Court of Lies that adjudicates what he calls "Fiat Lies" in order to neutralize their socially harmful effects.

This is the topic of his book (https://www.amazon.com/How-Get-Your-Lies-Back-ebook/dp/B07Q2DNJJK/), a talk for IDeaS (https://scs.hosted.panopto.com/Panopto/Pages/Viewer.aspx?id=d2f927ec-2783-45c8-a852-aaf500e76098&start=13.369692) and dozens of Medium.Com Articles analysing Medium.com content for lies using the method of the Internet Court of Lies now implemented as a MediaWiki (www.liecourt.com). The COVID-19 Pandemic has generated a rich source for the method of the Internet Court of Lies as illustrated in the following articles on Medium.com.

Thibadeau, Robert. "Virus Lies" https://medium.com/@rhtcmu/virus-lies-a434c2b684cf?source=friends_link&sk=f0bca1113a3a540563dd8baf8b6fc4bc
